

KI Wissen Final Event | 21-22 March 2024

Demonstration of Trajectory Prediction and Planning

Yue Yao, Mohamed-Khalil Bouzidi | Continental

1

Introduction

Recall of Knowledge Building Block

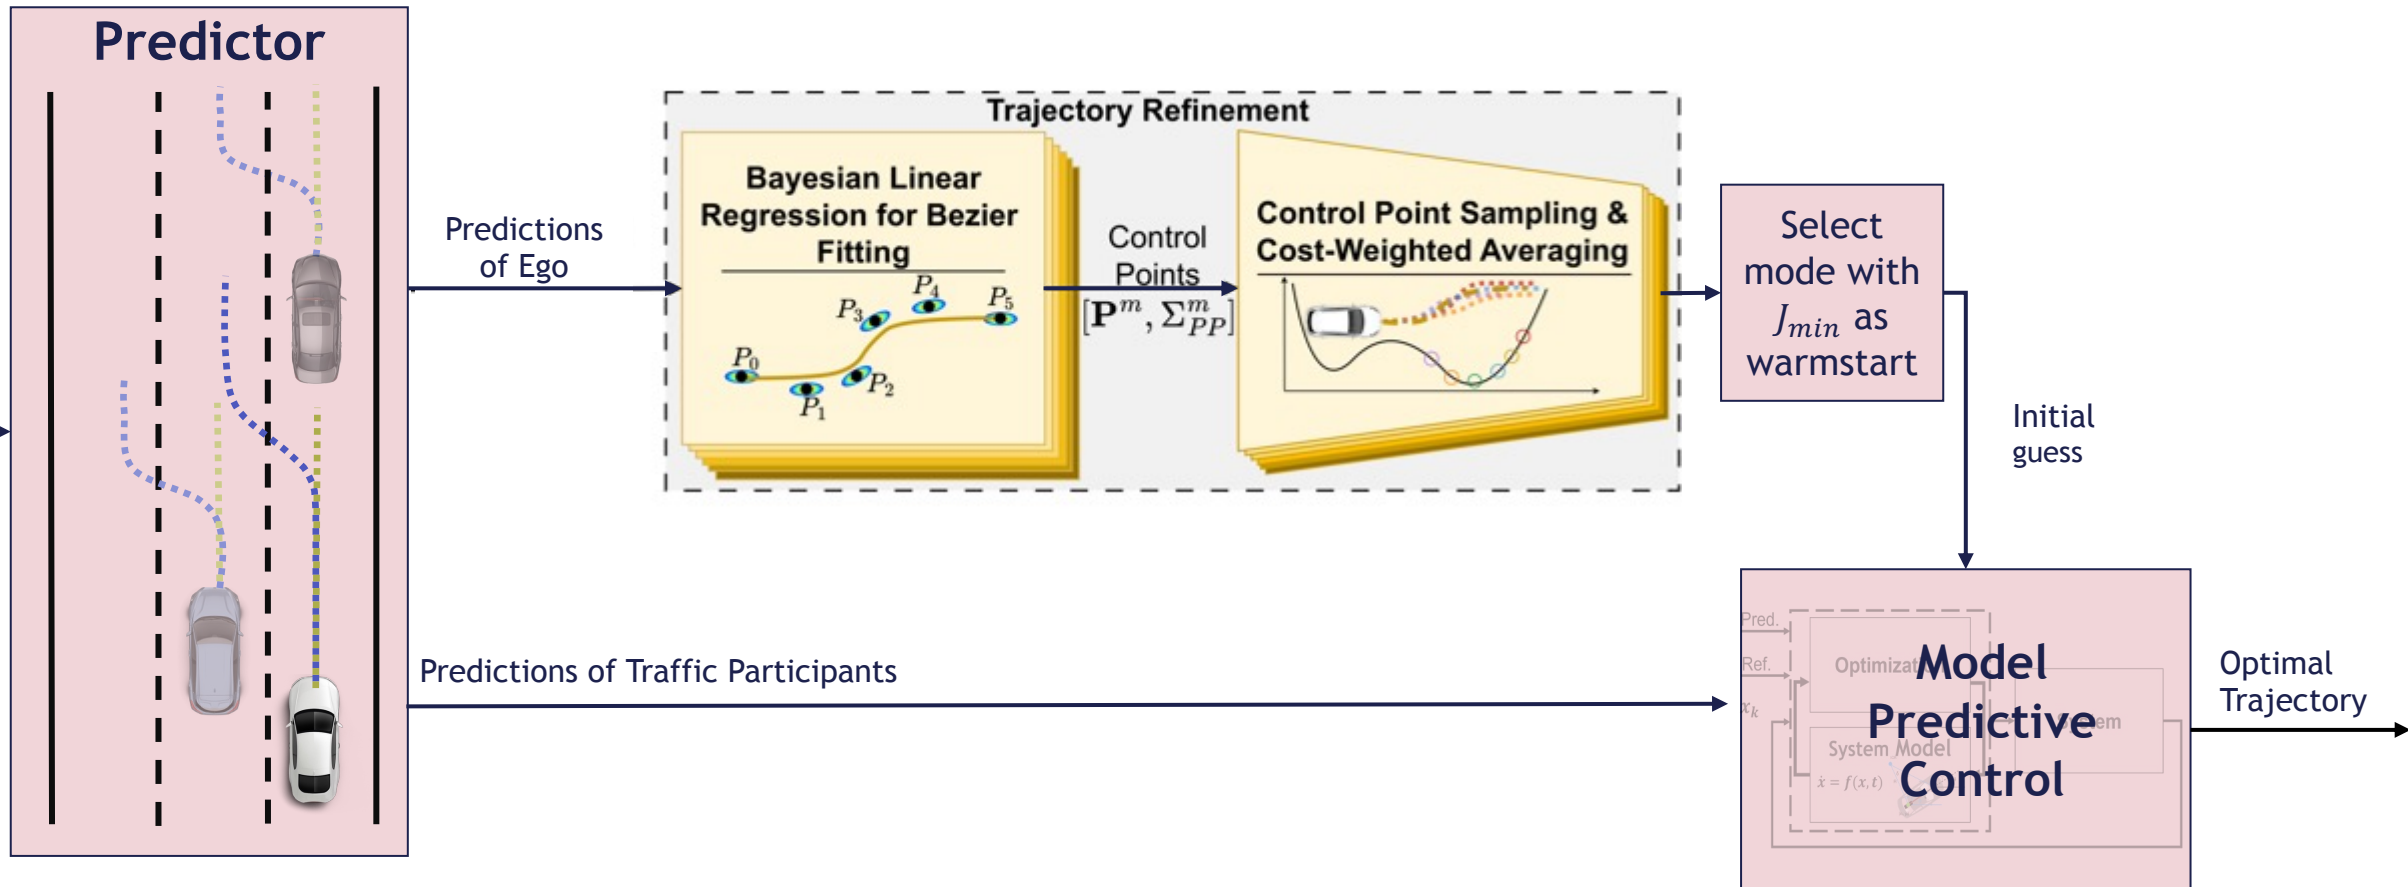

Trajectory Prediction

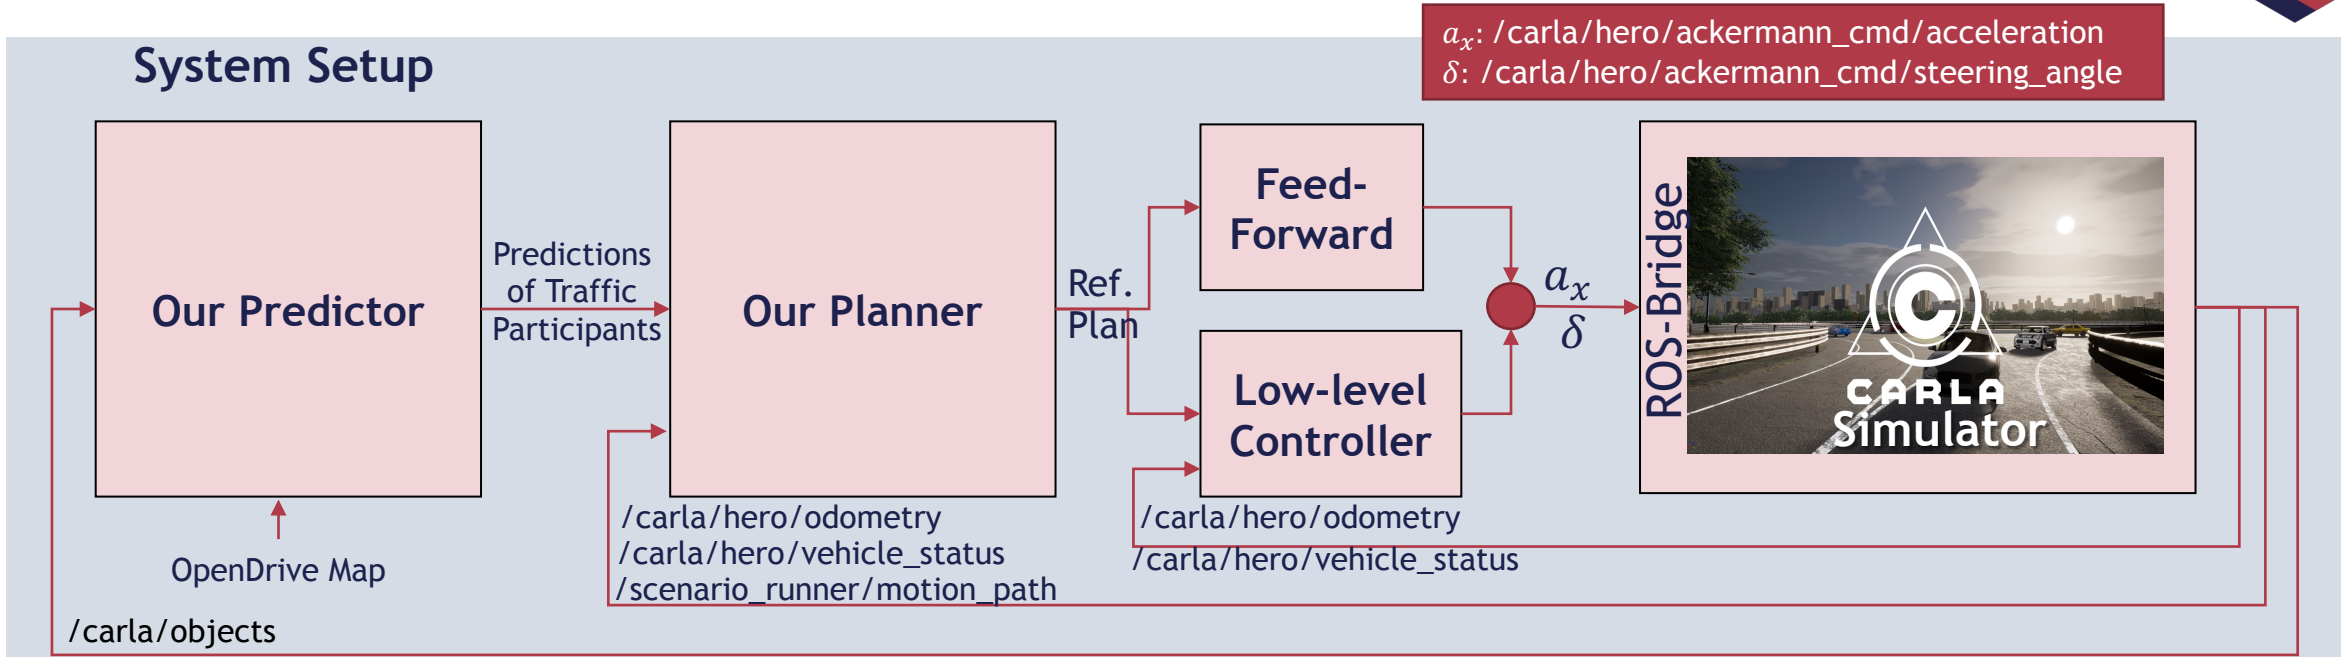

Our proposed model architecture. Agent histories and road geometry are both represented via polynomials. The current object kinematics and future kinematic states predicted by the model are fused into one continuous polynomial trajectory prediction. (© Continental AG)

Recall of Knowledge Building Block

Trajectory Planning

Integration to Carla Simulator

Use Cases

2

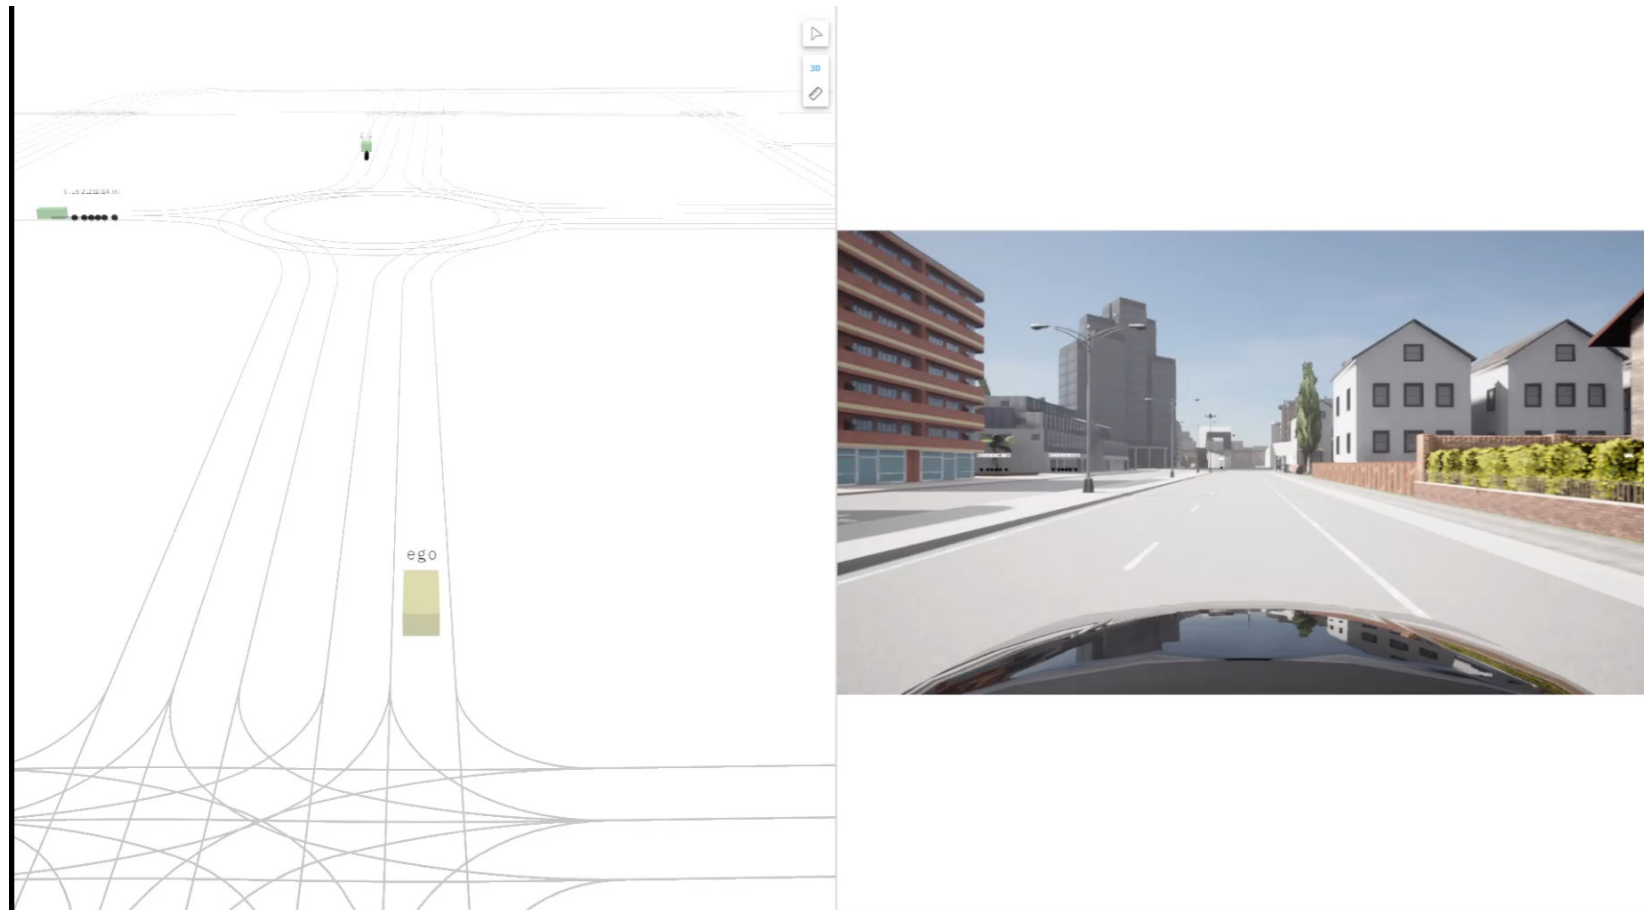

Demonstration of Trajectory Prediction

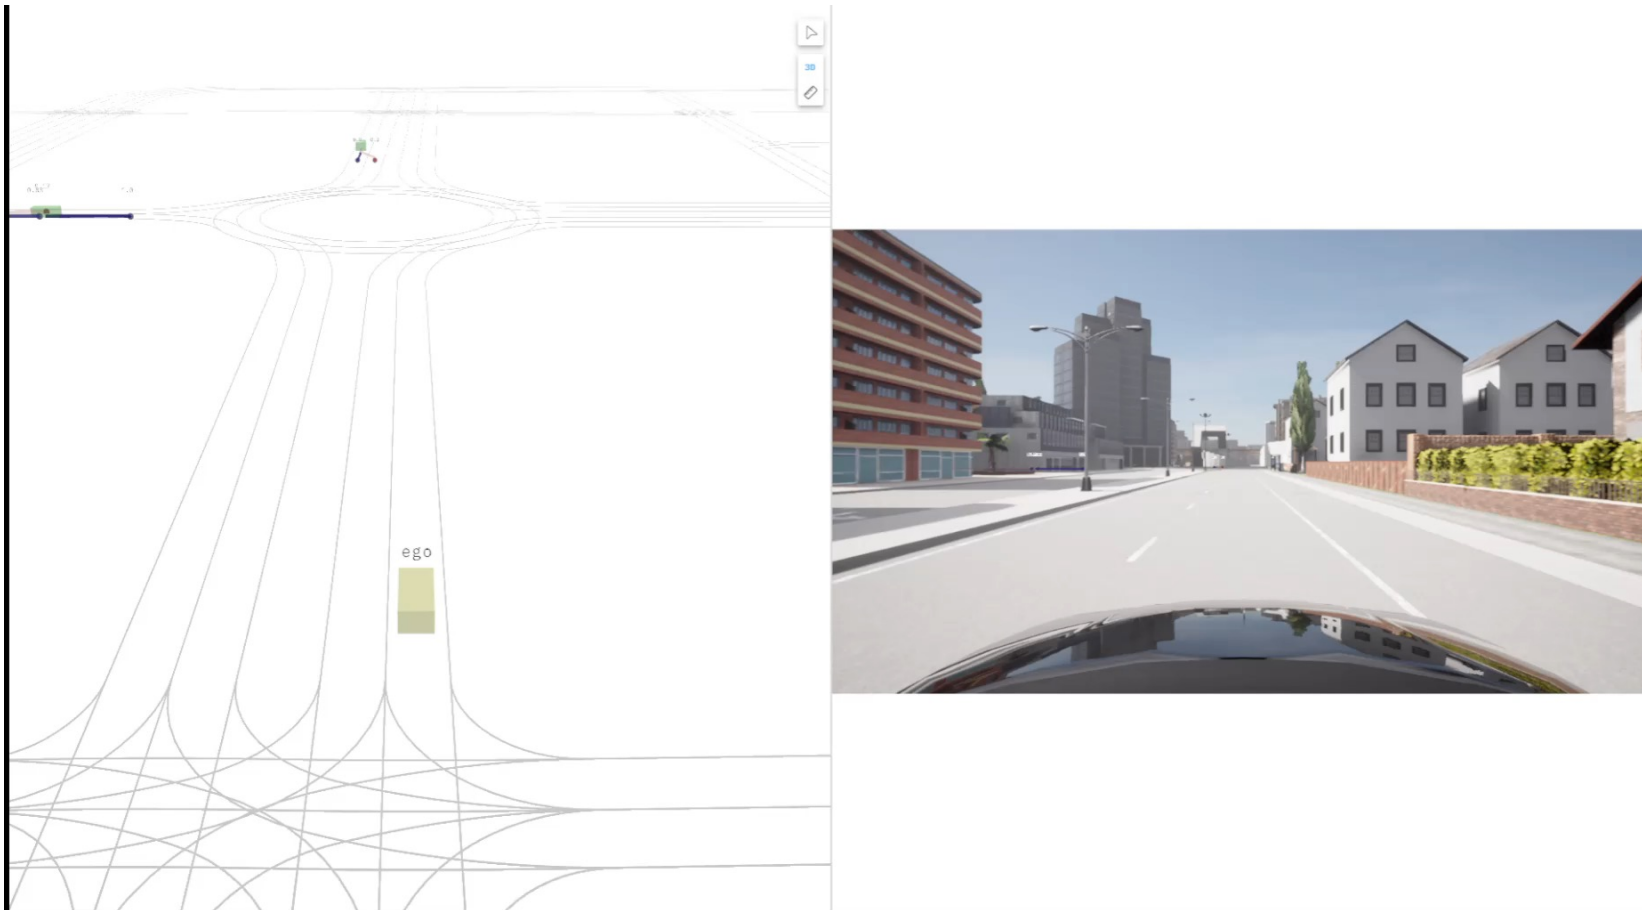

Use Case 2.2.1

State-of-the-Art: HiVT (CVPR2022 Argoverse 1 First Place)

Use Case 2.2.1

Our Approach

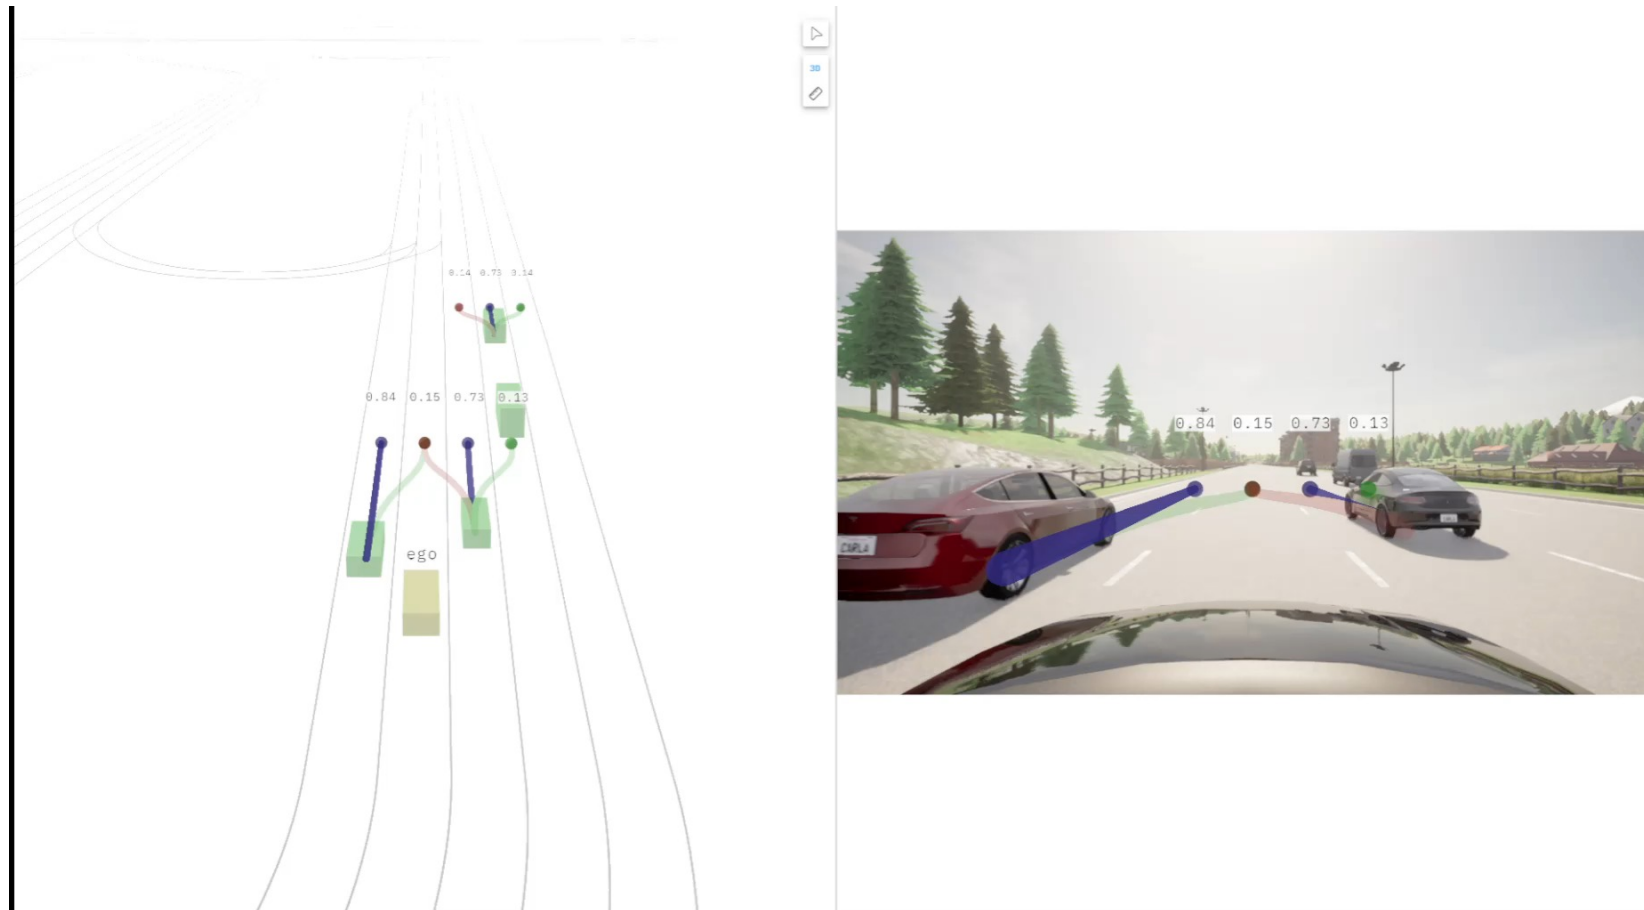

Use Case 2.3.1

State-of-the-Art: HiVT (CVPR2022 Argoverse 1 First Place)

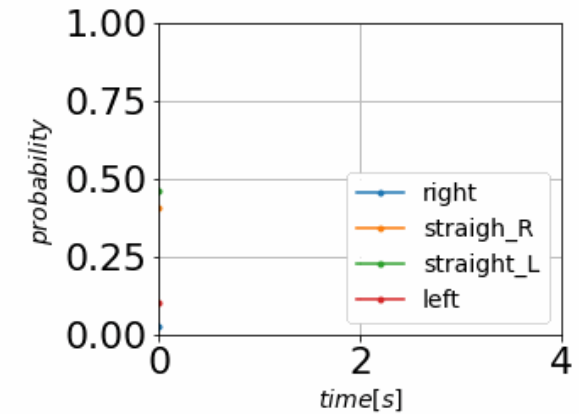

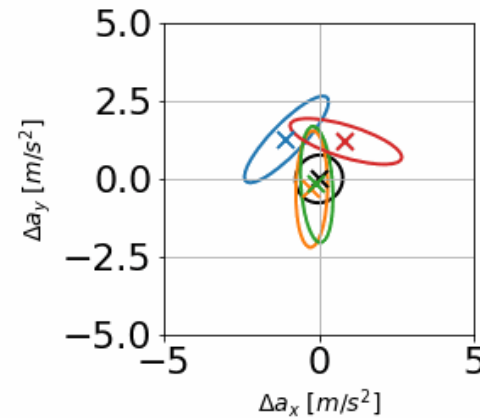

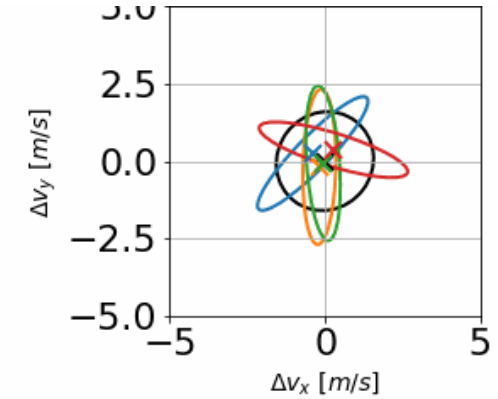

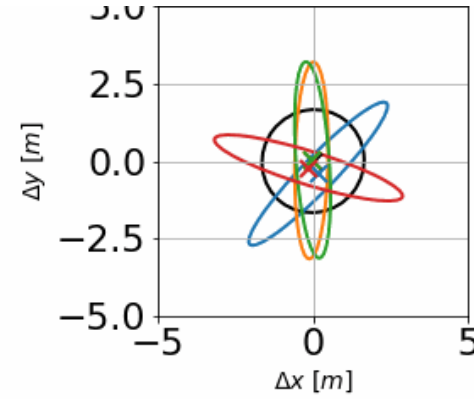

Use Case 2.3.1

Our Approach

Demo on Argoverse 1 Motion

Our Approach

Quantitive Results

Forecast-MAE^[1] QCNet^[2] EP (ours)

[1]: Cheng et al., Forecast-MAE: Self-supervised Pre-training for Motion Forecasting with Masked Autoencoders, ICCV 2023

[2]: Zhou et al., Query-Centric Trajectory Prediction, CVPR 2023

3

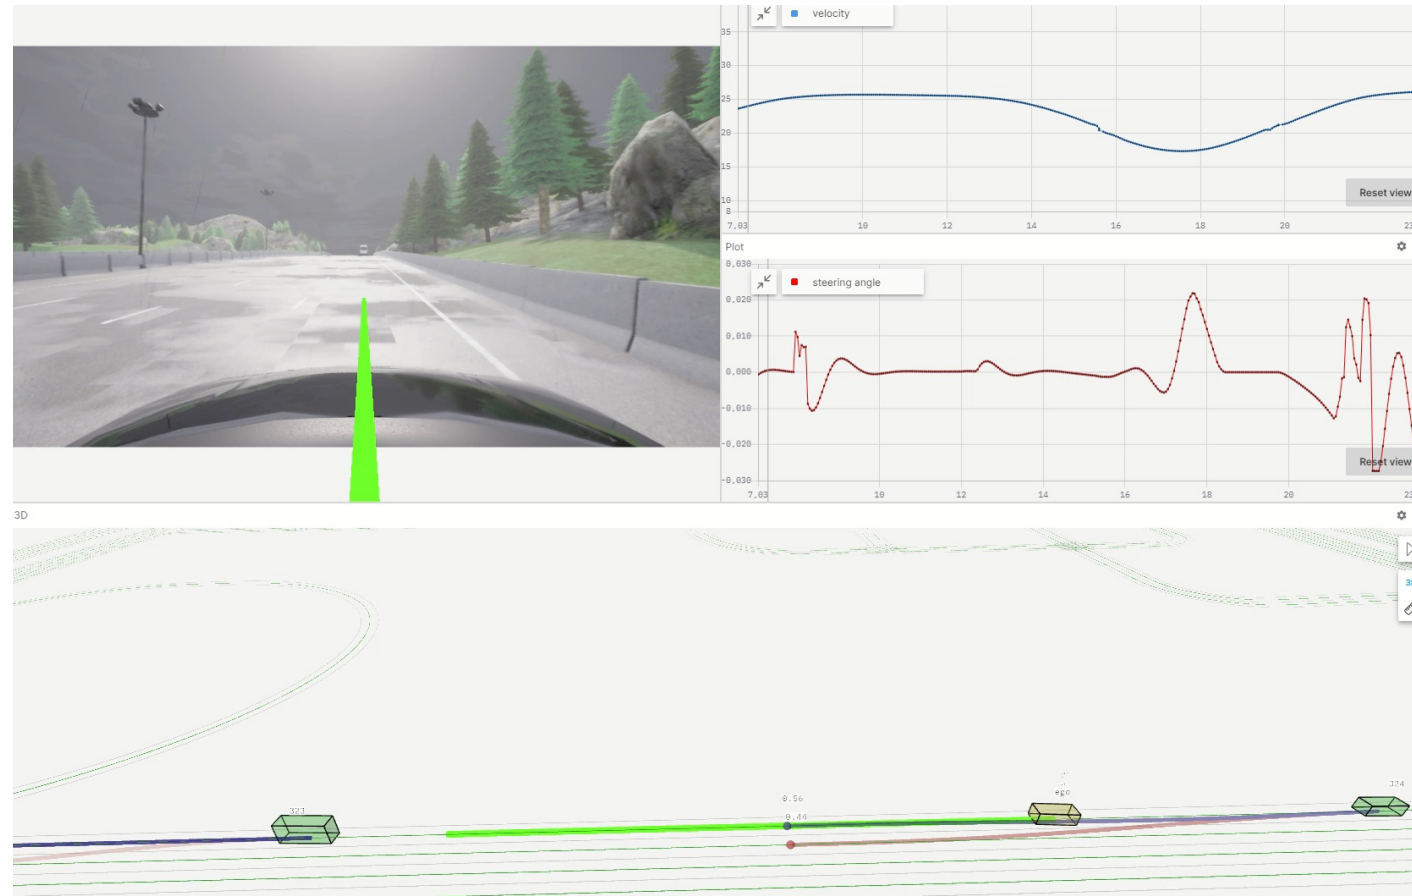

Demonstration of Trajectory Planning

Use Case 2.4.1

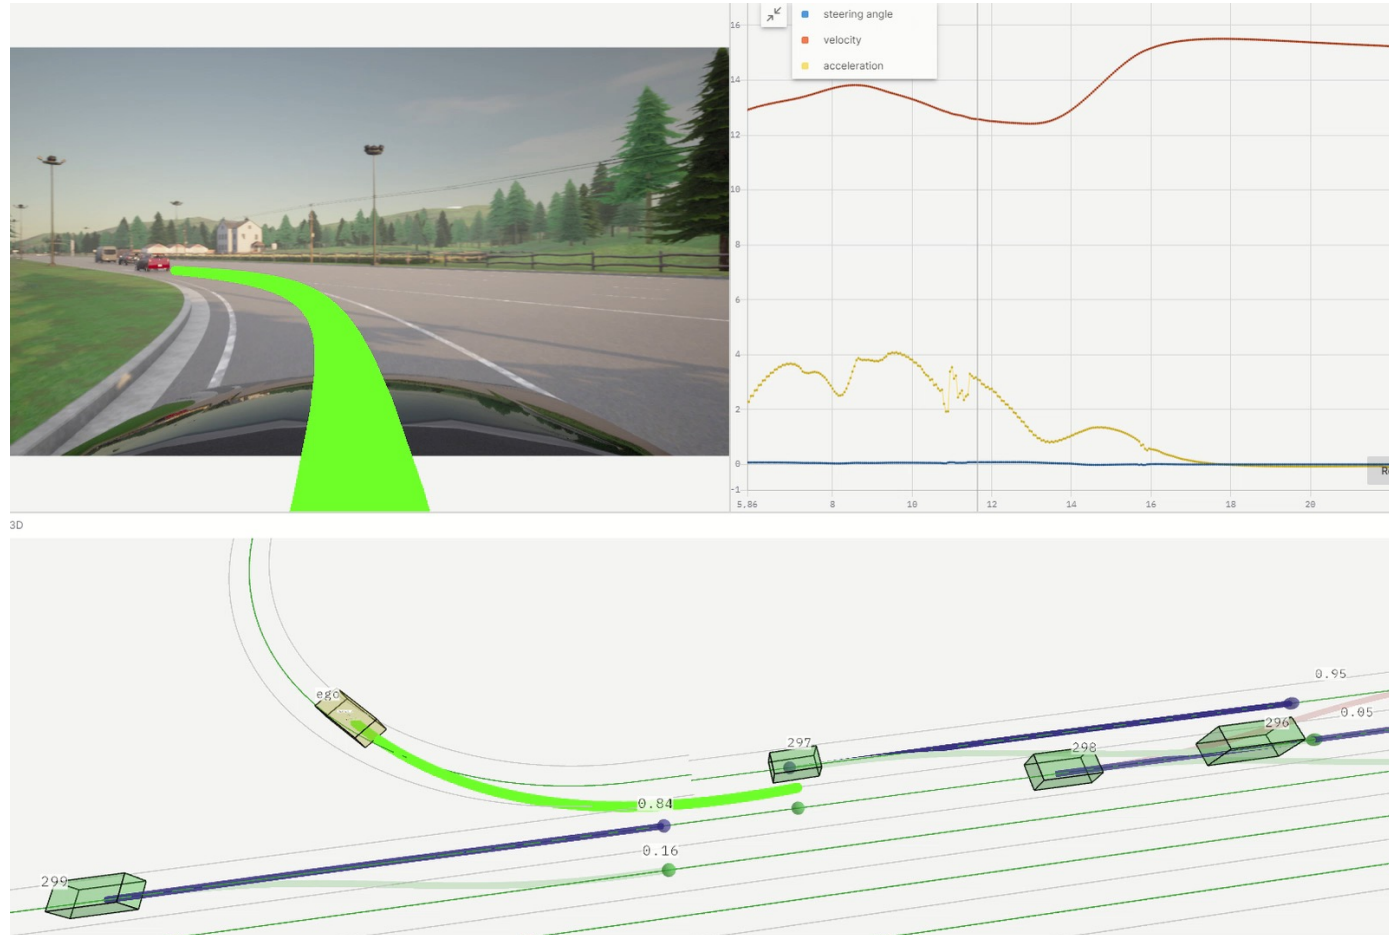

Integration of Predictor and Planner

Use Case 2.5.1

Integration of Predictor and Planner

Use Case 2.5.1

Examples from the Evaluation

I.) Baseline

II.) Baseline

Baseline: Warmstart Plan	— Behavior
Our Framework: Warmstart Plan	— Behavior
	Ego	(.....) Obstacle (Prediction)	

I.) Our Framework

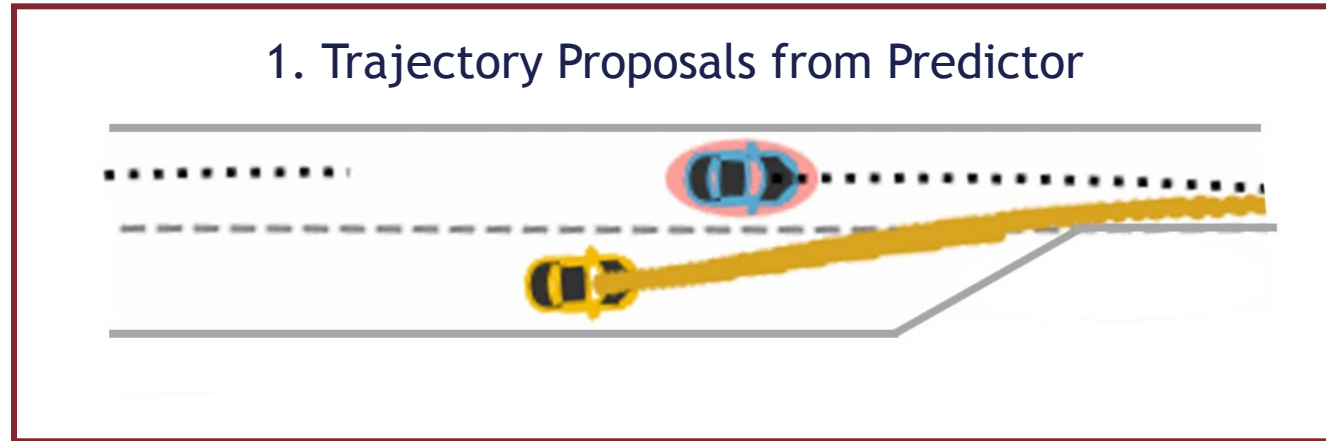

II.) Our Framework

Use Case 2.5.1

Deep Dive Demonstrations Learning-Aided Warmstart

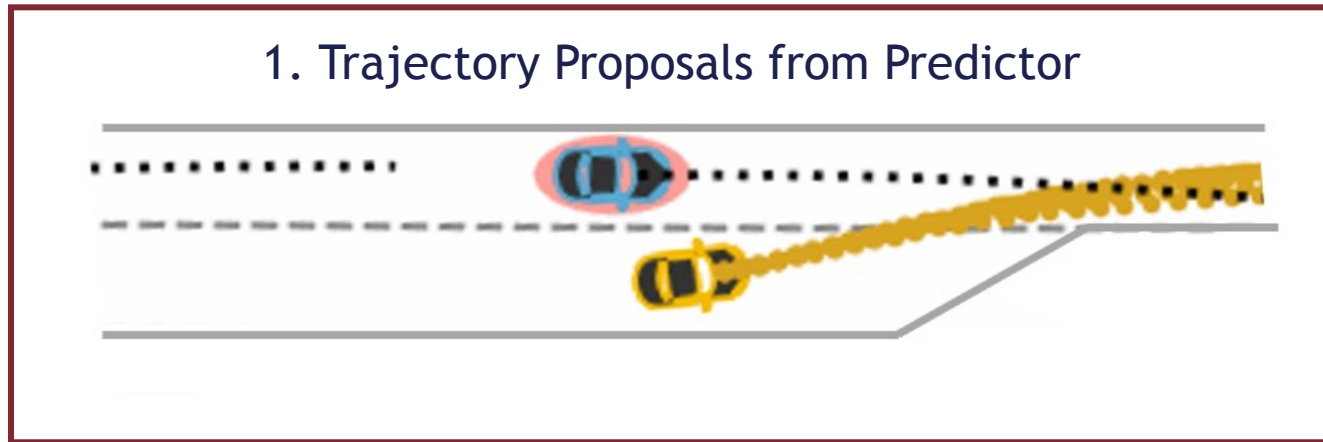

- Ego vehicle
- Obstacle
- Obstacle Predictions
- Ego Predictions
- Refined Proposals
- Selected Warmstart
- Optimal Trajectory

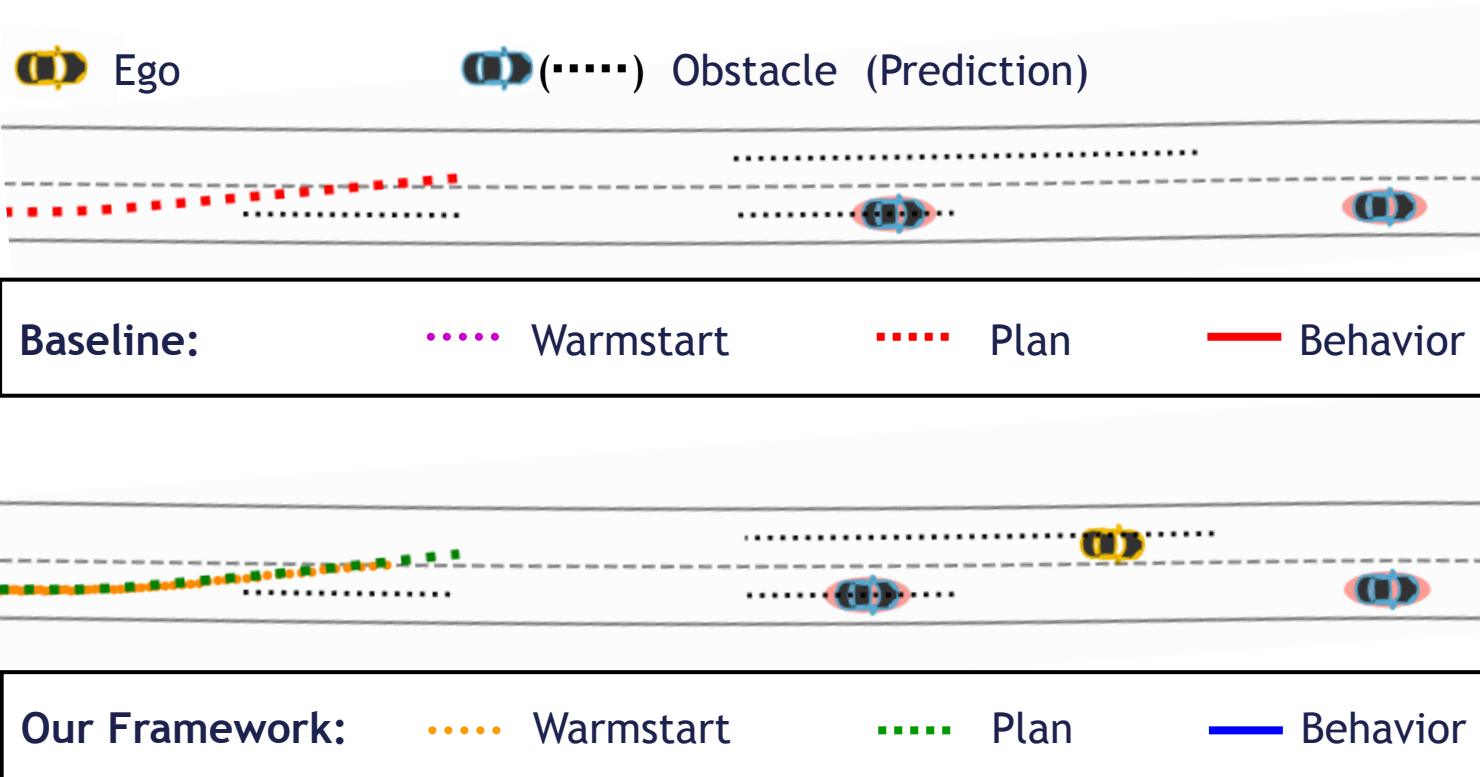

Use Case 2.5.1

Deep Dive Demonstrations Learning-Aided Warmstart

-  Ego vehicle
-  Obstacle
-  Obstacle Predictions
-  Ego Predictions
-  Refined Proposals
-  Selected Warmstart
-  Optimal Trajectory

Demonstration MPC in Non-Convex Problems

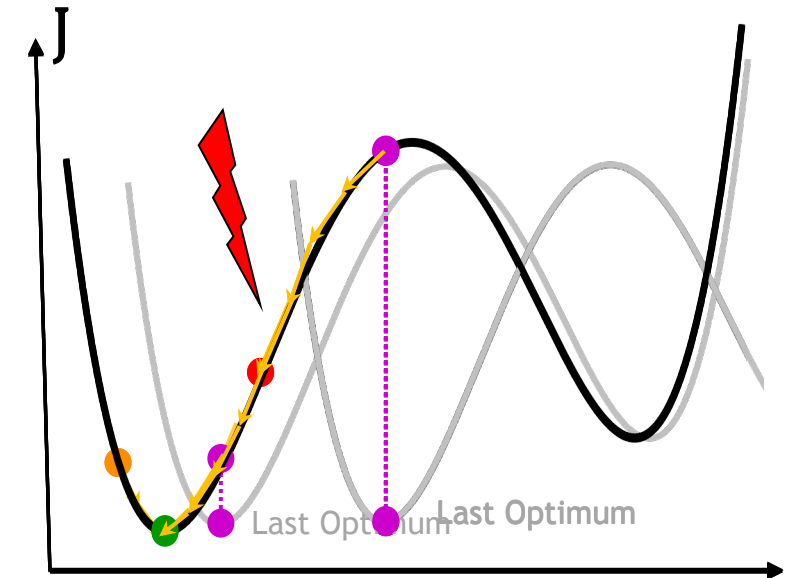

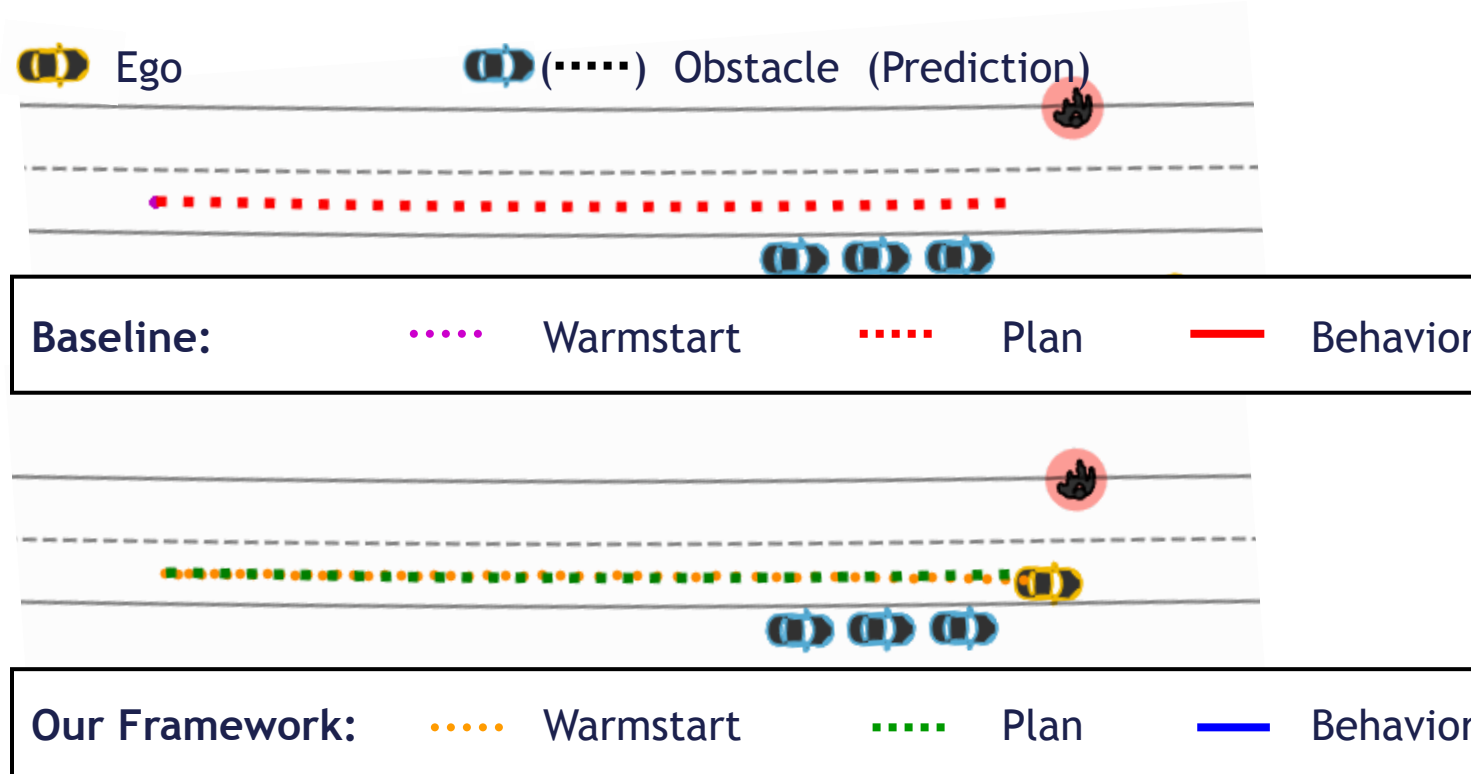

Limitations of MPC addressed by our approach:

1. Convergence to local optimum if initial guess too close

- Problematic especially in crowded environments since obstacles cause multiple local minima

Demonstration MPC in Uncertain Fast-Changing Traffic

Limitations of MPC addressed by our approach:

2. Slow convergence if Optimum is too far from initial guess (many optimization steps)

- Problematic especially in unknown fast-changing environments where last optimum is far from new one
